

SEO & AI Search Visibility Report

Prepared for Think Global Logistics — <https://tgl.co/>

Generated on August 04, 2026

78	89	67
OVERALL	SEO SCORE	AEO SCORE

This report evaluates two dimensions of search visibility: traditional on-page SEO (how well the page ranks in Google/Bing) and AI Answer Engine Optimization or AEO (how likely the page is to be surfaced or cited by AI tools such as ChatGPT, Perplexity, and Google AI Overviews).

On-Page SEO Analysis

Check	Result	Status
Title Tag	TGL International Freight Forwarder Complete Logistics	PASS
Meta Description	Australian owned international freight forwarder providing solutions in sea, air, domestic	PASS
H1 Heading	THINK GLOBAL LOGISTICS	PASS
Heading Structure	37 H2s, 45 H3s	PASS
Image Alt Text	38/124 images have alt text	NEEDS WORK
Content Length	2466 words	PASS
Internal Linking	104 internal links	PASS
HTTPS Security	Enabled	PASS
Canonical Tag	https://tgl.co/	PASS

Recommendations:

Image Alt Text: 86 image(s) missing alt attributes

AI Search Visibility (AEO) Analysis

AI answer engines increasingly answer user queries directly, often without a click-through to the source site. Pages that are structured for direct extraction are more likely to be cited as the source.

Check	Result	Status
Structured Data (Schema)	FAQPage, Organization	PASS
Question-Based Headings	1 question-style headings	NEEDS WORK
Direct-Answer Paragraphs	17 concise paragraphs found	PASS
E-E-A-T Signals	2/3 trust signals found	PASS
Lists & Tables	25 lists, 1 tables	PASS
Upfront Summary	First paragraph: 4 words	NEEDS WORK

Recommendations:

Question-Based Headings: Add question-style H2/H3s (e.g. "What is...", "How does...") — this is how AI engines extract answers

Upfront Summary: Open with a concise 20-60 word direct-answer paragraph before going into detail
